

6 EASY WAYS TO REDUCE YOUR BUSINESS ENERGY USAGE

#1

Switch Off

turn off unused lights and machines. Do not leave sleep mode or standby mode on, as even a blinking light can use up energy.

#2

Thermostat

program your thermostat to conserve energy when the office is not in use. Even 1°C of overheating can increase the cost of energy by up to 8%.

#3

Doors & Windows

sealed doors and windows are better for cooling in the summer and keeping the heat in during the winter, avoiding energy waste.

#4

Printing

only print when necessary and look to use online solutions such as DocuSign, to reduce paper waste as well as save money on energy.

#5

Energy Audit

we can provide invaluable advice tailored to your business on how to cut down on consumption, including Solar and Voltage Optimisation solutions.

#6

Contract Review

the best way to save on your energy is by ensuring you are on the best rates for your business. It can be daunting and time-consuming, but that is where we can help!
